DR. GRAZIA PACILLO

Senior Scientist & Co-Lead
[CGIAR FOCUS Climate Security](#)

Lead of the CGIAR Climate Security team and Senior Scientist at the Alliance of Bioversity and CIAT of CGIAR, she brings over 15 years of experience in research and evaluation on land, water and food systems transformation in the context of fragility, conflict and displacement. Her work focuses on the intersection of climate risks, conflict, displacement, and inequality, with an emphasis on generating applied evidence for anticipatory action, peacebuilding, humanitarian response and post-conflict recovery. She leads multi-country projects across Africa, Latin America, and Southeast Asia, combining conventional and frontier methods to assess the compound impacts of climate change on food and nutrition security, forced migration, poverty, and gender-based vulnerabilities.
