Dr. CHRISTINE NAM

Senior Climate Scientist

[Climate Service Center Germany](#)

Dr. Christine Nam is a senior climate scientist who is working at the nexus of climate change, space, and security. Dr. Nam's research has focused on the extraction and customization of indices from climate model projections, enabling the assessment and identification of climate risks affecting operations across a wide range of sectors, including critical infrastructure related to space systems, health, water, and electricity. Dr. Nam was selected as an inaugural fellow of the NATO Climate Change and Security Center of Excellence in 2025 and has shared her framework of systematically approaching climate risks policymakers, military personnel, researchers, and civilian practitioners from over 22 countries, helping to integrate cross-border, cascading, and compounding climate considerations into strategic security planning.
